

Tejas Sunil Gumgaonkar

Riverside, CA | tejassgg@gmail.com | +1 559-388-6490 | [tejas-gumgaonkar](https://www.linkedin.com/in/tejas-gumgaonkar)

Software Engineer .NET with 2.6+ years of enterprise-level development experience specializing in C#, .NET Core, TypeScript, and modern front-end frameworks, with a strong focus on scalable SPAs, RESTful APIs, and performance optimization. Proven expertise in building high-quality web applications, observability dashboards, and AI-integrated solutions across regulated enterprise environments.

SKILLS

- **Programming Languages:** C#, C++, JavaScript, TypeScript, Python.
- **Web Tech:** .NET MVC, .NET Framework, .NET Core, Web API, React.js, Next.js, Express.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Blazor, jQuery, Ajax, WebSockets.
- **Database Tech:** MS SQL Server, MySQL, TSQL, Entity Framework, LINQ, ADO.NET, MongoDB (NoSQL), Redis.
- **Cloud & DevOps:** AWS (Lambda, S3, EC2), Azure (Functions, DevOps, TFS), Git, GitHub, Docker, IAM, GCP.
- **Testing & QA:** Unit Testing, Postman, API Testing, Vulnerability Assessments, CMake, Performance & Load Testing.
- **AI/ML:** OpenAI LLMs, TensorFlow, RAG, LLM Integration, Agentic Workflows, AI Agent Development, NumPy, Pandas, Matplotlib, Deep Learning, scikit-learn.
- **Observability & Monitoring:** Application Performance Monitoring (APM), Dynatrace, Logging, Dashboards, Database Performance Analyzer (DPA), Autocannon, Performance & Load Testing.
- **Development Tech:** Cursor, GitHub Copilot, Visual Studio, SSMS, Blender, NuGet Package Management, npm, Figma.

WORK EXPERIENCE

IT Applications Developer II, County of Riverside – ACR

Mar 2026 - Present

- Develop and maintain complex enterprise-level government applications utilizing C#, .NET Core, Blazor and SSMS.
- Reduced application load time by 93% (from 8s to 0.5s) by implementing server-side pagination in SQL Stored Procedures and utilizing Blazor QuickGrid for efficient data rendering.
- Design scalable data integrations leveraging Laserfiche for document OCR to streamline document management workflow
- Monitor database activity and troubleshoot performance bottlenecks utilizing DPA, implementing observability dashboards, logging, and alerting to ensure high availability for critical platforms.

Software Engineer | Persistent Systems Limited

July 2021 – Aug 2023

- Designed and maintained efficient, reusable code using OOPs principles and MVC design patterns for scalable systems supporting critical health insurance operations using C#, .NET, MVC, Blazor and Web APIs, modernizing legacy systems.
- Optimized 25+ SQL stored procedures using Entity Framework and ADO.NET with data modeling for enhanced efficiency.
- Improved critical API response time by 2.8s through performance optimization and event-driven architecture implementation.
- Led comprehensive security assessment (VAPT), resolving 50+ vulnerabilities in production systems ensuring compliance.
- Developed and consumed RESTful Web APIs using JSON and XML, allowing external partners to integrate with the system.
- Orchestrated deployment across 4 environments using IIS and DevOps following Agile/Scrum methodologies.
- Implemented comprehensive testing strategies including unit testing and automated API testing using Fiddler & postman.
- Utilized Visual Studio, Azure DevOps, and Team Foundation Server (TFS) for version control throughout the SDLC, implementing secure coding standards & faster integration.
- Managed 22+ change requests delivering updates on schedule & enhancing full-stack development functionality.
- Conducted code reviews and updated engineering standards using Azure DevOps, which improved code quality & team collaboration in a distributed environment.

Software Engineering Intern | Persistent System Limited

Jan 2021 - July 2021

- Developed secure web applications with token-based authentication using C# and ASP.NET Web APIs.
- Implemented MVC architecture for responsive applications using ASP.NET MVC, Entity Framework, and SQL Server.

EDUCATION

California State University, Fresno
Master of Science, Computer Science

Aug 2025
Fresno, CA

GH Raisoni College of Engineering (GHRCE) – RTMNU
Bachelor of Engineering, Computer Science Engineering

May 2021
Nagpur, IN

ACADEMIC & PERSONAL PROJECTS

TeamLabs - Project Management Platform

- Built full-stack application from scratch using OAuth2, MERN Stack and Next.js with modern TypeScript implementation.
- Implemented RESTful web services with JWT auth & WebSockets, real-time task tracking, and role-based access control.
- Integrated AI with RAG using Gemini-AI SDK & LLMs with agentic workflows and prompt engineering for intelligent project report generation and automated insights.
- Applied Agile/Scrum methodologies with iterative code reviews and created technical documentation for API integration.

Research Project - Node.js Event Loop Efficiency Enhancement

Jan 2025 – Aug 2025

- Designed and implemented adaptive event batching system for Node.JS optimizing high-concurrency performance.
- Developed a simulation environment to collect and analyze performance metrics under various load conditions.
- Created a hybrid data structure optimizing O(1) access time for both sequential and categorized event processing.
- Technologies used: C++, CMake, Node.js, JavaScript, LibUV, Autocannon for load testing, data visualization libraries.
